

Whole School Assemblies on Energy Saving

January to March 2018

This winter, we are providing schools with 25 minute whole school assemblies on saving energy and water, with various fun demonstrations including thermometer cards, a thermal-imaging camera and different types of insulation and water-saving devices.

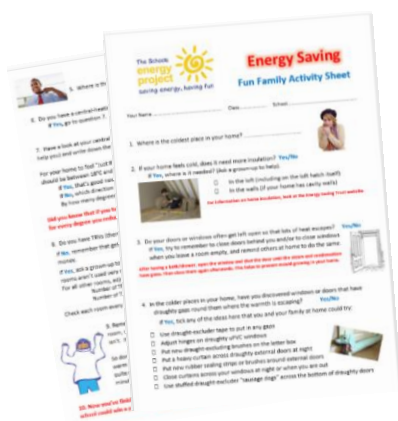

On the day of the assembly, you will be given a batch of thermometer cards, kindly funded by the Project's sponsors. There will be enough cards for one to be put up in every room in your school, to help the children and staff monitor if the school's heating system is too hot, too cold or Just Right!

The Schools Energy Project is your home a comfortable temperature? Check with your free Thermometer Card

27°C	80°F	Too Hot	Turn your heating down
24°C	75°F		
21°C	70°F	Just Right	Do not adjust your heating
18°C	65°F		
15°C	60°F	Cool	Turn your heating up
12°C	55°F		
9°C	50°F	Too Cold	Danger of hypothermia

Sponsors: Southern Water, SGN, Scottish & Southern Electricity Networks

www.schoolsenergyproject.org.uk

We provide a fun Family Activity Sheet for the children to use at home with their families, and a letter to parents and carers. The schools that have the most completed sheets brought back into school by their pupils will win a prize!

The Schools Energy Project can provide whole school assemblies during the Spring Term this year. If your school would like the Project to provide an Assembly, please get in touch using our Contact Form here on the website.
