

# Whole School Assemblies on

## The Best Things we can do to Save the Planet

2020

This year, for the first time, we are providing schools with whole school assemblies on the Best Things we can do to Save the Planet.

This assembly will focus on what we can do to reduce the harm that we as humans are doing to the planet. The areas of litter, repairing things, nature conservation and thinking about the energy and food consumed by human society, and more, will be included, but we can highlight any specific topics to suit your preference.

We will provide a fun Family Activity Sheet, following up on the topics covered in the Assembly, for the children to use at home with their families, and a letter to parents and carers. The school that has the most completed sheets brought back into school by their pupils will win a prize!

**The Schools Energy Project are providing whole school assemblies on The Best Things we can do to Save the Planet throughout 2020. Please get in touch using our Contact Form here on the website.**
